

OptiComm International TV

The OptiComm network delivers television via fibre to the premises. This can be expanded to include International TV, allowing you to tailor digital TV channel offerings to residents of diverse cultural backgrounds. Adding International TV to your development is a powerful way to attract buyers with a compelling point of difference from your competitors.

What is International TV?

You can select from a suite of International TV content. The ones you choose can be delivered as Free-to-View TV channels across the OptiComm network in your development.

Choose from these great channels

There are so many options available and the list of stations is always being updated. This is the latest selection...
