## CHOICE\*

Choose from over 30 Retail Service Providers

## 1Gbps\*

RSP's now offering up to 1Gbps internet speeds

\*Varies state-by-state

# Connected Commercial Developments

One Smart Fibre Does it All

# OptiComm delivers Integrated Communications Networks in major Commercial Developments

OptiComm deploys networks and turnkey solutions in retail shopping centres, commercial buildings and hotels. In addition to telecommunications, in commercial developments, OptiComm deploys a range of application specific technologies across an Integrated Communications Network (ICN). The ICN supports a wide range of IP enabled technologies including Commercial Wi-Fi, IP PABX Systems, CCTV Systems, Background Music and AV including Digital Signage, PA / EWIS Systems, Building Access Control Systems and BMS.

OptiComm infrastructure can be functionally or structurally separated from the Telecommunications network to enable transfer of ownership to the Owners Corporation. **OptiComm provide network integration services for the ICN and facilitate the integration of building systems onto the network.**

Business grade internet services, such as dark fibre or 10 Gig, can be tailored to suit individual demands. Retail service providers offer a variety of plans of up to 1Gbps internet speeds and beyond, for increased internet demands and local businesses.

**OVER 12 YEARS** optic fibre experience in Australia

**EASY TO ADD** future technologies to the system

**+** Direct line to your own **PROJECT MANAGER**
